

Why use a Solar pool cover?

Cover your pool with a good quality solar pool blanket, and enjoy the benefits.

In Australia, solar pool covers are the most popular choice for domestic (and even many commercial) pools. Practical and cost effective, solar pool covers offer many key benefits.

You will save water

We sell mostly Abgal Oasis Solar covers, which have been tested and proven to stop up to 99% of evaporation.

Many people find that they no longer need to 'top up' their pool levels at all once they start using a solar cover.

Use less chemicals

Another benefit to stopping evaporation is reduced chemical consumption. Because of this, when you install a solar pool cover for the first time, it is important to turn your chlorinator down by around half.

A warmer pool

A solar pool cover will attract heat from the sun, and transfer that heat into your pool water. Using a solar cover can increase your pool temperature by up to 8°C, and extend your swimming season by several weeks.

Less leaves

You know all those leaves you have to scoop out of your pool? If you keep the cover on, the leaves sit on top of the cover, instead of falling into your pool!

Just sweep or use a blower to get leaves off the cover before you take it off.

If leaves and debris are a significant problem, you should consider an actual leaf cover.

Reduced power consumption

With less leaves and debris sitting on the pool floor, your

pool vacuum and pump do not need to work as hard. You may also be able to reduce the amount of hours that you run your pump for (but this is dependant on your pump type and pool environment and usage).

Deter birds

If you've ever had problems with migrating ducks and other birds dropping by, you know what a mess they can leave behind. The key to stopping ducks is to remove the visual appeal as they fly overhead - cover the pool, and they will fly right on by to the next pool or lake.

More 'you' time

Less leaves to scoop, no duck poop to scrub off - you might actually have more time to enjoy your pool!

Talk to your local pool shop for maintenance advice.
